Required Documentation to Bill SLP at the Professional Level

The following is the definition of Speech, Hearing and Language Service based on the approved Medicaid State Plan

Evaluation and treatment services related to speech, hearing or language disorders, which result in communication disabilities. Services are performed by or under the direction of a speech-language pathologist or audiologist who has a certificate of clinical competence from the American Speech and Hearing Association, or who has the equivalent education and work experience to qualify for the certificate.

Based on the above definition the following documentation is required to bill a provider as a professional for SLP services, or for a provider to sign a documentation log as supervisor:

1. A current or expired Certificate of Clinical Competence from the American Speech and Hearing Association
2. A State of Vermont Clinical SLP/Audiologist License AND proof of the completion of a Clinical Fellowship year (Speech-Language Pathology Clinical Fellowship Report and Rating Form)
 - A Provisional State of Vermont Clinical SLP/Audiologist License can be substituted as proof of Clinical Fellowship year once a full license has been issued
3. A Provisional State of Vermont Clinical SLP/Audiologist License
 - A Provisional Clinical License is issued when an individual has met all requirements but is in the process of completing their Clinical Fellowship year
